-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/20/04 has been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-10,21,22,25-28,29 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is unclear what is recited through use of "minimal increase in a resistance". The term appears to not add to the claim and should be deleted because it is inherent in any increase as discussed below.

Claims 1-10,21,22,25-28,29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alling et al in combination with Mahneke, Kowalski and Krishnamoorthy et al.

The rejection is maintained as stated in the paper mailed 9/16/03 and as stated in the advisory action mailed 1/6/04.

One of ordinary skill in the art would have been led to the recited concentrations of wetting agent and Zn concentration through routine experimentation as discussed in the office action mailed 9/16/03.

Art Unit: 2823

Alling discloses the amount of resistivity increase as preferable as opposed to necessary.

Furthermore, the amount of resistivity increase is "minimal" as compared to other processes which obtain a greater increase in resistivity.

Applicant's arguments are addressed in the statement of the rejection above.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (703) 308-0956 until 2/4/04. See MPEP 203.08.
